Fourth Electromobile production day

Knowledge hub for industry and research

The change in mobility is one of the major issues of our time. The transformation from a conventional to an electric drive train affects the entire value chain from automobile manufacturers through component suppliers to machine and plant manufacturers. Innovative production processes and vehicle concepts play a central role. The Electromobile Production Day in Aachen aims to set impulses for the entire electromobility industry and to make an important contribution to the development of this future market.

The fourth Electromobile Production Day on October 26, 2016 in Aachen brings together process and product managers from industry and research and, supported by its scientific background, offers the opportunity to exchange knowledge along the electric vehicle value chain.

The Electromobile Production Day will focus on the following four central areas:

- Potential within the production of traction batteries for electric vehicles
- Competitive production of electric powertrain components
- Production of economical electric vehicles
- Successful market launch of alternative vehicle concepts and business models

We cordially invite you to the fourth EPD to discuss current experiences and solutions in the field of electromobile production with representatives from industry, research and politics.

Location:
Manfred-Weck-Haus
Steinbachstraße 19
52074 Aachen

Costs:
490 € (incl. conference documents, lunch, refreshments during breaks)

Laboratory for Machine Tools and Production Engineering (WZL)

The Laboratory for Machine Tools and Production Engineering (WZL) of RWTH Aachen University has stood worldwide for more than 100 years for future-oriented research and successful innovations in the field of production technology.

Under the leadership of four professors Christian Brecher, Fritz Klocke, Robert Schmitt und Günther Schuh, the WZL is conducting research in six areas - production technology, machine tools, production systems, transmission technology, production metrology and quality management - on the future-oriented

Aachen, den 04.08.2016

design of production in high-wage countries. Together with industry partners from various sectors, the WZL develops solutions for a wide variety of production scenarios in both publicly funded and bilateral projects. These activities are being consolidated on the RWTH Aachen Campus in the Cluster Production Engineering.

WZLforum at RWTH Aachen University

For more than 20 years, the WZLforum at the RWTH Aachen - formerly Aditec gGmbH - has been the leading provider of technical production training and continuing education. The programmes are addressed to specialists and managers who can acquire implementation-oriented know-how on the basis of scientifically founded knowledge. They have the opportunity to keep their skills up-to-date and enrich them with new, innovative topics. The goal of all partners in the WZL and Fraunhofer IPT network is to provide you with the latest equipment for global competition.
