Third Expert Forum “Global Production”

How can production networks be adapted to the constantly changing challenges in the business environment?

This question as well as other central challenges that come along with the design of global production networks will be discussed at the third expert forum “Global Production” on September 28, 2020, in Stuttgart. In addition to a top-class round of experts from industry, the forum will be chaired by Prof. Gisela Lanza from the Karlsruhe Institute of Technology, Prof. Thomas Friedli from the University of St. Gallen and Prof. Schuh from the Laboratory for Machine Tools and Production Engineering (WZL) at RWTH Aachen University.

After the expert forum received a very positive response in 2016 and 2018, this year's participants will be given even more intensive insights into the upcoming trends and success factors in the future-oriented design of production networks through keynote speeches and discussions. Lectures by high-ranking industry representatives will complement the event and deepen the insights through best-practice examples as well as by conveying relevant methods.

PRESS RELEASE

Aachen, August 25, 2020

Interested parties are cordially invited to use the expert forum for the exchange of experience and knowledge, as well as to critically examine their own production network, identify potentials and obtain information about current trends in the global production environment.

Corona Update

The event will be held physically at the Hotel Steigenberger Graf Zeppelin in Stuttgart in compliance with a security concept. Additionally, there is the possibility to participate virtually in the event at a reduced price.

If a physical implementation is not possible due to a renewed tightening of the official requirements, the event will be held virtually at a reduced price.

All further information on participation in the third expert forum “Global Production” can be found at www.globaleproduktion.de.

Laboratory for Machine Tools and Production Engineering

The Laboratory for Machine Tools and Production Engineering (WZL) of RWTH Aachen University enhances the innovative strength and competitiveness of the industry with trend-setting basic research, applied re-search and the associated consulting and implementation projects in the field of production technology. In the research fields of manufacturing technology, machine tools, production engineering, gear technology as well as production metrology and quality management, practical solutions for rationalizing production are developed with industrial partners from a broad range of branches.
